

TURBOCHEF TECHNOLOGIES, INC.

HISTORY & OVERVIEW

1991 TurboChef is founded.

1994 TurboChef introduces its first viable commercial oven. Between 1994 and 2000, TurboChef introduces the D1, D2, and D3 models.

1997 TurboChef forms an alliance with Maytag Corporation and G.S. Blodgett Corporation from 1997-2000.

2000 TurboChef further develops its commercial technologies for the commercial food industry and introduces the C3™ oven.

2003 New management team positions TurboChef for broadened product development and manufacturing.

2004 In March, TurboChef enters its largest commercial foodservice equipment supply arrangement with SUBWAY® restaurants. TurboChef installs approximately 19,000 Tornado® ovens between May 2004 and February 2005. As of today, TurboChef has 35,000 Tornado® ovens installed in SUBWAY® restaurants in over 60 countries worldwide.

TurboChef acquires Eneryst in March.

In December, TurboChef enters into an agreement with Starbucks Coffee Company to be its exclusive oven supplier.

2005 TurboChef acquires IP assets of Global Appliance Technologies, Inc.

2007 TurboChef signs a contract with Dunkin' Donuts® and to date has installed 10,500 ovens.

TurboChef introduces its Residential Double Wall Oven.

2008 TurboChef introduces the i5™ rapid cook oven, High h Conveyor 3240™, High h Conveyor 2020™, and the Residential Single Wall Oven.

To date TurboChef has built and installed nearly 70,000 ovens worldwide.

OVERVIEW

Since its inception in 1991, TurboChef Technologies has pioneered the rapidly-emerging world of speed cooking. The result of top-grade engineering and testing, TurboChef® ovens feature proprietary technology, which combines superior air impingement with other rapid-cook methods to create high heat transfer rates.
